## Investing in our schools

As part of the NSW Government's plan to rebuild public education, the 2024-25 Budget is delivering record education funding, including \$3.6 billion for new and upgraded schools in Western Sydney. This targeted investment will ensure growing communities get access to a world class public education.

## Project overview

A project to upgrade Condell Park High School is progressing. The upgrade will include new modern facilities in 2 new buildings and refurbishment and landscaping across the existing school. It includes:

- 16 new classrooms with 3 indoor learning commons
- 3 outdoor learning commons
- new staff spaces including staff study and staff facilities
- new school hall and canteen with multipurpose sport court
- relocated and extended staff car park with added loading zone
- significant refurbishment of the existing administration space including a new secure entrance
- refurbishment of all teaching spaces
- expansion of the support unit to 7 support classrooms
- removal of all demountable classrooms

## Progress summary

We are pleased to announce that ADCO has been selected as the construction contractor for the upgrade. We are working with the contractor to finalise the design of the new buildings. Construction of the carpark and new buildings are expected to begin in mid-2025, with the car park being the first area to be upgraded, followed by the school buildings. More information will be released closer to these works starting.

We are delivering this project using a classification of works which do not require a Development Application, called a Complying Development Certificate (CDC). CDC plans and works are assessed by an accredited certifier rather than a local council. Once the approval is received, we will update you on the project progress, including the construction and delivery timeline.

We are currently preparing the foundations for new demountable buildings as shown in red on the map on the next page. The new demountable buildings will accommodate students in Term 2, until the classrooms in the new buildings are complete. The older demountable buildings marked in purple, will be removed from site to make way for the upgrade to begin. We anticipate these works will be completed by May 2025.

### Legend

-  Location of new demountable buildings
-  Older demountable buildings to be removed

### Next steps

Now that ADCO has been appointed, we will create a timeline for the completion of all work. Once this timeline is ready, we will share the details with the community.

Site establishment including construction hoarding for the carpark is expected to go up in June 2025. Once the carpark is complete, site establishment and work on the remainder of the project will commence. We are anticipating that construction will begin mid-2025 and we will provide a notice to the community closer to this date.

### More information
